Examination by Attorney		
4:5-11:2	John Doe, stated her name for record. Exhibit 1 was <i>Dr. XXX</i> curriculum vitae. He was an orthopedic surgeon. He was a practicing orthopedist and had office five days a week. He had done medical legal work since 1976. He knew the difference between workman’s compensation and litigation work. He usually worked for the plaintiff. He had worked for the defense firm before. He explained the amount that he charged for his work. He had also testified in trials.	Introduction
11:3-17:23	Dr. Doe had never met Regina in person. He agreed that Regina had undergone a surgery for spinal stenosis. He explained the term spinal stenosis. He agreed that bladder dysfunction was a sign of spinal stenosis. He stated that the symptom of real stenosis for bladder was bladder incontinence. He explained about the congenital spinal stenosis. Dr. Doe also reviewed Regina’s MRI and CAT scan. He had reviewed all records after June of 2015. He agreed that there are some downsides in reviewing medical records.	Dr. Joe’s review of Regina’s medical records
17:24-20:25	Dr. Doe had opined that Regina had spinal stenosis as a result of the cord compression due to osteophytes. He explained that the bone spurs were due to degeneration. A person with cord compression would have pain, difficulty in walking, tingling and weakness. He agreed that Regina’s compression had existed before this wreck itself.	Dr. Joe’s opinion for Regina’s spinal stenosis
21:1-26:25	Dr. Doe explained that the symptoms would sometimes never show itself and may be diagnosed when they are being scanned for some other condition. He stated that trauma could have aggravated the pre-existing condition. He agreed that the accident could had caused her the symptoms by aggravating her condition for which she was asymptomatic before the accident. His difference of opinion was that the preexisting osteophyte disk complex pre-existed before her automobile wreck and it was possible that the wreck aggravated the condition causing the symptoms necessitating surgery.	Dr. Joe’s opinion of Regina’s symptoms after collision and the cause of surgery
